DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 recites the limitation "the rod" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 and 9-17 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2092717 (Weirich).

The Weirich reference discloses a pilot operated check valve comprising a valve body/ball 11, a valve seat 13, a pilot piston rod 24, a gasket 25, a valve spring 12, a pilot spring 20, an inlet port 14, an outlet port 16, a pilot port 23, and a pilot drain 21.

Claims 1, 2, and 4-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Seaney.

The Seaney reference discloses a pilot operated check valve comprising a valve body/ball 46, a valve seat 43, a pilot piston rod 37, a valve spring 47, a pilot spring 59, an inlet port 58, an outlet port 45, and a valve block 11.

Claims 18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Deem.

The Deem reference discloses an assembly comprising a pump 35, a pilot actuator 72 having a first portion 74 and a second portion 76, a pressure relief valve 86, and an outlet 56.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Vik reference discloses a similar pilot actuated check valve.
